

\_\_\_\_\_ believes that more must be done to raise awareness of the educational challenges and needs of boys, and that the decline in boys' achievement calls for the creation of specialized programs focused on raising boys' academic performance. In support of that effort, our organization wishes to join the Boys and Schools Coalition.

As a member of the Boys and Schools Coalition, we authorize the listing of our organization in materials related to the Coalition, including the Boys and Schools website, as well as in general listings of Coalition members. In addition, we will:

- Receive and disseminate to our staff, members and supporters information about Coalition goals and resources;
- Utilize our existing web-based and email information distribution networks to inform our friends and supporters about this pressing problem and encourage their involvement in the Coalition's activities;
- Coordinate with Coalition members to educate policymakers about the need for action.
